EDUCATION

Indian Institute of Technology, Jammu B.Tech in Computer Science CGPA: 8.1 (Current)	2021 – 2025 (Expected)
Step by Step Public School 12th Standard Percentage: 81%	2018 – 2020
Step by Step Public School 10th Standard Percentage: 85.8%	2016 – 2018

WORK EXPERIENCE

Research Intern Indian Institute of Technology, Jodhpur (Remote) Conducting research on Federated Learning for skin disease segmentation under Dr. Bikash Santra. - Tools & technologies used: Vision Transformer, Unet, TransUnet, Federated Learning, Pytorch, Matplotlib, Pandas, Numpy, Python - Implementing TransUNet to enhance the segmentation accuracy of skin disease images. - Focusing on leveraging Federated Learning to improve data privacy and model robustness in medical image analysis.	May 2024 – Jul 2024
Crapcycle Waste Solution Pvt. Ltd. Designed and implemented a platform where vendors and buyers can interact to buy and sell recyclable items. - Tools & technologies used: MySQL, Express.js, React.js, Multer, Json web token, Versal, git/github - Integrated end-to-end functionality: Ensured seamless interaction between the frontend and backend, enhancing user experience and operational efficiency.	Jun 2024 – Present

PROJECTS

Project Pioneer Backend-Developer Developed a scalable and secure backend architecture for a college website. - Tools & technologies used: MySQL, Node.js, Express.js, JWT token - Implemented a CGPA-based project allocation algorithm to efficiently assign projects to students.	Nov 2023 – Present
DishDelight Designed an intuitive interface for easy navigation and a streamlined purchase process of food recipes. Website - Tools & technologies used: MongoDB, React JS, Node JS, Express, Stripe payment gateway - Implemented JWT authentication for secure user transactions and integrated Stripe for seamless payment processing. - Automated the delivery of PDF receipts and email notifications to enhance user satisfaction and operational efficiency.	Jul 2023 – Present
Crop Pest Detection: Real-Time Monitoring Facilitated seamless integration into pest management workflows for enhanced agricultural productivity. GitHub - Tools & technologies used: Deep Learning, Pytorch, Google colab - Deployed YOLOv5 for real-time detection and classification of crop pests.	Oct 2023 – Present

SKILLS

Programming Languages: Python, JavaScript, HTML, CSS

Web Development: React.js, Node.js, Express.js, MySQL, MongoDB

Machine Learning & Deep Learning: Pytorch, TensorFlow, Keras, OpenCV

Tools & Technologies: Git, GitHub, JWT, Stripe, Matplotlib, Pandas, Numpy

COURSEWORK

Courses: Data Structures, Algorithms, Machine Learning, Deep Learning, Computer Vision, Database Systems
